INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/050057

Re Item V.

<u>Claims 1-15</u>

- (N) A stable pharmaceutical <u>solid or semisolid dispersion</u> comprising I) at least one oxidation-susceptible and poorly water-soluble active agent, ii) a hydrophilic carrier and iii) a water-soluble vitamin E derivative, is not disclosed in the documents cited in the search report.
 - The same applies to the method of inhibiting oxidative degradation of said active agent according to claim 14, and the process for preparing said solid or semisolid dispersion according to claim 15.
- (IS) The object of the present application is to provide a stable pharmaceutical <u>solid or semisolid dispersion</u> comprising at least one oxidation-susceptible and poorly water-soluble active agent, <u>in a hydrophilic carrier</u>.
 - Said object has been achieved by adding a water-soluble vitamin E derivative (see description, example 4 and 5).
 - The documents cited in the search report address the problem of solubility of taxan-compounds, disclosing <u>solutions</u> of other poorly water-soluble agents using water-soluble vitamin E derivatives.
 - The use of water-soluble vitamin E derivatives in solid or semisolid dispersions comprising a hydrophilic carrier to inhibit oxidative degradation, is not suggested.
- (IA) The industrial applicability is given.
